

QA Summary Report

Not ready for release

Summary — Manual QA testing was performed on demoblaze.com across 5 functional areas: Login, Browse, Cart, Checkout, and UI. A total of **20 test cases** were executed producing **16 passes** and **4 direct failures**. An additional **4 bugs** were observed within passing tests. A total of **8 bugs** were identified and are ready to be logged in Jira. The site is **not recommended for release** due to a Critical bug where orders complete with any random credit card input — no card validation exists.

BUG SOURCE KEY **FAIL** = **FOUND FROM A FAILED TEST** **PASS (DEFECT)** = **DEFECT INSIDE A PASS** **PASS (OBS)** = **OBSERVATION**

BUG-001	Critical	Fail	Order completes with any random credit card input — no card validation	TC-016	▼
STEPS TO REPRODUCE 1. Log in and add item to cart 2. Click Place Order 3. Type random letters/numbers in Credit card field 4. Fill all other fields normally 5. Click Purchase EXPECTED Error alert — invalid credit card. Order should NOT be placed. ACTUAL Success popup appeared. Order confirmed with ID. No validation on card field. IMPACT Anyone can place an order with a completely invalid credit card number.					
BUG-002	High	Pass (defect)	Cart total does not update after removing an item — requires page refresh	TC-012	▼
STEPS TO REPRODUCE 1. Log in and add 2 products to cart 2. Go to Cart page 3. Click Delete on one product 4. Observe the Total at the bottom EXPECTED Cart total recalculates immediately after deletion. ACTUAL Total still shows original combined price. Only updates after manual page refresh (F5). IMPACT Users see incorrect pricing after removing items — may think they are being overcharged.					
BUG-003	Medium	Fail	Checkout validation message is not specific about which field is empty	TC-015	▼
STEPS TO REPRODUCE 1. Add item to cart 2. Click Place Order 3. Leave Name blank, fill all other fields 4. Click Purchase EXPECTED Alert specifies that Name is required only. ACTUAL Alert says 'Please fill out Name and Credit card' even though only Name was empty. IMPACT Confusing UX — users do not know which specific field needs attention.					
BUG-004	Medium	Fail	Product images cut off on right side on mobile at 375px width	TC-020	▼

STEPS TO REPRODUCE 1. Open Chrome DevTools (F12) 2. Set device width to 375px 3. Navigate to demoblaze.com 4. Click any product to open detail page 5. Observe the product image EXPECTED ACTUAL IMPACT Product images display fully within the screen width. Right side of product image is cut off and not visible at 375px width. Mobile users cannot see full product images — affects purchase decisions.				
BUG-005	Medium	Pass (obs)	Guest users can add items to cart without logging in — no authentication enforced	TC-010 ▼
STEPS TO REPRODUCE 1. Open demoblaze.com without logging in 2. Click any product 3. Click Add to cart 4. Observe what happens EXPECTED ACTUAL IMPACT Site prompts user to log in before adding to cart. Item added silently with no login prompt. Guests can add items freely. Cart items may be lost on session end for guest users. No way to track guest orders.				
BUG-006	Low	Fail	Console warning on page load — VideoJS plugin registered multiple times	TC-018 ▼
STEPS TO REPRODUCE 1. Open Chrome DevTools (F12) before loading the page 2. Click Console tab 3. Navigate to demoblaze.com 4. Observe the console output EXPECTED ACTUAL IMPACT No warnings or errors in the console on page load. Warning: VIDEOJS: WARN: A plugin named 'reloadSourceOnError' already exists. Indicates a JavaScript configuration issue. May cause video playback problems.				
BUG-007	Low	Pass (obs)	Typo in registration error message — 'already exist' missing letter s	TC-005 ▼

STEPS TO REPRODUCE

- 1. Click Sign up
- 2. Enter a username that is already registered
- 3. Enter any password
- 4. Click Sign up
- 5. Read the alert text

EXPECTED

Alert reads: 'This user already exists.'

ACTUAL

Alert reads: 'This user already exist.' — letter s missing at the end.

IMPACT

Grammar error visible to all users who attempt to register an existing username.

BUG-008

Low

Pass (obs) No cart item count badge visible in the navigation bar

TC-011 ▼

STEPS TO REPRODUCE

- 1. Log in
- 2. Add 1 or more items to the cart
- 3. Observe the nav bar

EXPECTED

A badge or number appears on the Cart link showing how many items are in the cart.

ACTUAL

No badge or count appears anywhere in the nav. Users must open the cart to see item count.

IMPACT

Poor UX — users have no quick way to know how many items are in their cart.

Has observations

ID	CATEGORY	PRI	TEST NAME	RESULT
TC-001	Login	High	Login with valid credentials Login worked. Username appears in top right nav.	Pass
TC-002	Login	High	Login with invalid credentials Browser alert said 'Wrong password.' Login modal stayed open.	Pass
TC-003	Login	High	Login with empty fields Alert showed fields required. No field highlighted in red. ⚠ No inline field validation — plain browser alert only.	Pass
TC-004	Login	Med	Logout successfully Nav reverted to Log in. Session ended on refresh.	Pass
TC-005	Login	Med	Register a new account Sign up successful. Typo found in error — 'already exist' missing s. ⚠ Typo: 'This user already exist' should be 'already exists'.	Pass
TC-006	Browse	Med	Browse products on homepage All products displayed image, name and price correctly.	Pass
TC-007	Browse	Med	Filter by category: Phones Only phone products shown. Filter worked instantly.	Pass
TC-008	Browse	Med	Filter by category: Laptops Only laptops shown. Stable across multiple switches.	Pass
TC-009	Browse	Low	View product detail page Product page loaded with image, name, price, description and Add to cart.	Pass
TC-010	Cart	High	Add a product to cart Product added. Alert said 'Product added.' Appeared in cart. ⚠ Guest users can add to cart without logging in — no authentication enforced.	Pass

RECOMMENDATIONS

WHAT WORKS WELL

- ✓ Login and logout flow
- ✓ Product browsing and filtering
- ✓ Product detail pages
- ✓ Multi-item cart management
- ✓ Checkout happy path
- ✓ All navigation links
- ✓ Long text input handling

WHAT NEEDS FIXING

- X Credit card input accepts any value — Critical
- X Cart total not recalculating after deletion — High
- X Checkout validation message not field-specific — Medium
- X Product image cut off on mobile 375px — Medium
- X Guest add-to-cart with no login prompt — Medium
- X VideoJS console warning on load — Low
- X Typo 'already exist' in error message — Low
- X No cart item count badge in nav — Low
