

TC-001: Log in with valid credentials.

Precondition: You must have already registered an account on demoblaze. The login modal must be closed before starting.

Steps:

1. Go to demoblaze.com
2. Click Log in
3. Enter a valid username and password
4. Click the Log in button

Expected: User is logged in. Nav bar shows your username.

Actual: Login worked. Username appears in the top right nav confirming the user is logged in.

Status: Pass

TC-002: Log in with invalid credentials.

Precondition: An account must exist with a known username. You must be logged out. You will intentionally enter the wrong password.

Steps:

1. Go to demoblaze.com
2. Click Log in
3. Enter a valid username and a WRONG password
4. Click the Log in button

Expected: An alert/popup appears saying "Wrong password."

Actual: A plain browser alert appeared saying "Wrong password." The login modal stayed open and the user was not logged in.

Status: Pass

TC-003: Log in with empty fields.

Precondition: No account needed — you are testing the empty state. You must be logged out so the Log in button is visible in the nav.

Steps:

1. Click Log in
2. Leave both username and password blank
3. Click Log in

Expected: An alert appears saying fields are required.

Actual: A browser alert appeared saying "Please fill out Username and Password." No login occurred. No specific field was highlighted in red.

Status: Pass

TC-004: Logout successfully.

Precondition: You must be fully logged in with a valid account before starting this test. The nav must show your username.

Steps:

1. Log in with valid credentials
2. Click Log in
3. Click Log out from the dropdown

Expected: User is logged out. Nav bar shows Log in again.

Actual: Clicking Log out removed the username from the nav and replaced it with Log in and Sign up. Refreshing the page confirmed the session had ended.

Status: Pass

TC-005: Register a new account.

Precondition: You must be logged out. You need a unique username that has not been used before - make one up fresh each time you run this test.

Steps:

1. Click Sign up in the top right
2. Enter a new unique username
3. Enter a password
4. Click Sign up

Expected: A popup appears: "Sign up successful."

Actual: Alert said "Sign up successful." The new account could immediately be used to log in. When the same username was tried again a second time, the alert said "This user already exist." - note the typo, missing the letter s at the end of exist.

Status: Pass

TC-006: Browse products on homepage.

Precondition: No account or login needed. Just open the homepage. No prior actions required - this tests the public-facing product grid.

Steps:

1. Open demoblaze.com
2. Scroll through the product grid on the homepage

Expected: All products show an image, a name, and a price.

Actual: All products displayed an image, name and price correctly.

Status: Pass

TC-007: Filter by category: Phones.

Precondition: No login needed. Start on the homepage with the default "All" view showing all products before clicking the Phones filter.

Steps:

1. On the homepage, find the left sidebar
2. Click Phones

Expected: Only phone products are displayed. Laptop and monitor products disappear.

Actual: Only phone products appeared after clicking Phones. The filter worked instantly without reloading the page. All 7 phone products were shown and no laptops or monitors appeared.

Status: Pass

TC-008: Filter by category: Laptops.

Precondition: No login needed. Start on the homepage. You can run this immediately after TC-007 since you are already in the category sidebar.

Steps:

1. Click Laptops in the left sidebar

Expected: Only laptop products are shown.

Actual: Only laptop products appeared. Switching back and forth between Phones and Laptops multiple times continued to work correctly each time. No wrong products appeared.

Status: Pass

TC-009: View product detail page.

Precondition: No login needed. Start on the homepage with products visible. Any product can be clicked - pick one from the grid.

Steps:

1. Click any product on the homepage
2. Observe the product detail page

Expected: Product page shows name, image, price, and a description.

Actual: The product detail page loaded with a large image, the product name, price in dollars, a short text description and an Add to cart button. Clicking the browser back button returned correctly to the homepage.

Status: Pass

TC-010: Add a product to cart.

Precondition: Must be logged in. Navigate to any product detail page first. The cart should be empty before running this test for clean results.

Steps:

1. Click any product
2. Click Add to cart
3. Accept the alert popup that appears

Expected: Product is added. A success alert says "Product added".

Actual: A browser alert said "Product added." After dismissing the alert and navigating to the Cart page, the product appeared in the cart with its name and price.

Note - this also worked without being logged in, meaning any guest user can add an item. without logging in.

Status: Pass

TC-011: Add multiple products to cart.

Precondition: Must be logged in. Start with an empty cart - delete any existing items first. You need to add 3 different products one by one.

Steps:

1. Add 3 different products to cart one by one
2. Go to Cart

Expected: All 3 products appear in the cart.

Actual: All 3 products appeared in the cart as separate rows, each showing the correct name and price. However there was no item count badge visible anywhere in the nav bar, so the only way to know how many items were in the cart was to open the cart page.

Status: Pass

TC-012: Remove a product from cart.

Precondition: Must be logged in AND have at least 1 item already in the cart before starting. Run TC-010 first if the cart is empty.

Steps:

1. Have at least 1 item in cart
2. Go to Cart page
3. Click Delete next to a product

Expected: The product is removed. The cart total updates.

Actual: The product was removed from the list visually. However the Total shown at the bottom of the cart page did not change. It still showed the original combined price of both items.

Status: Pass

TC-013: Cart total calculated correctly.

Precondition: Must be logged in. Start with an empty cart. Note the exact prices of 2 products before adding them so you can verify the math.

Steps:

1. Add 2 products with known prices (note them down)
2. Go to Cart
3. Check the Total shown at the bottom

Expected: Total = sum of both product prices.

Actual: On a fresh cart with no previous deletions, the total added up correctly. For example adding a \$360 phone and an \$820 laptop showed a total of \$1180 which is correct.

Status: Pass

TC-014: Complete checkout with valid data.

Precondition: Must be logged in and have at least 1 item in the cart. Have test data ready: a fake name, country, city, card number, month and year.

Steps:

1. Add an item to cart
2. Click Place Order
3. Fill in Name, Country, City, Credit card, Month, Year
4. Click Purchase

Expected: A popup says "Thank you for your purchase!" with an order confirmation.

Actual: A popup appeared saying "Thank you for your purchase!" followed by a confirmation ID, the amount, card number and name.

Status: Pass

TC-015: Submit checkout with Name empty.

Precondition: Must be logged in with 1 item in the cart. You will intentionally leave the Name field blank - fill all other fields normally.

Steps:

1. Add item to cart
2. Click Place Order
3. Leave the Name field completely blank
4. Fill in all other fields
5. Click Purchase

Expected: An alert appears saying Name is required. Order is NOT placed.

Actual: A browser alert appeared saying "Please fill out Name and Credit card." The order was not placed. However the message appeared even though only Name was empty - it mentioned Credit card too even though that field was filled in. The message is not specific enough about which field is missing.

Status: Fail

TC-016: Submit checkout with any random Credit card numbers or letters input .

Precondition: Must be logged in with 1 item in the cart. Fill all fields except Credit card - type any random numbers or letters. This tests the Critical bug.

Steps:

1. Add item to cart
2. Click Place Order
3. Type any random numbers or letters for Credit card
4. Fill in all other fields
5. Click Purchase

Expected: An alert appears saying Credit card error.

Actual: No error appeared. The success popup appeared saying "Thank you for your purchase!" and the order was confirmed with an ID number. The order went through with any random numbers or letters typed in the credit card field. This is a Critical bug.

Status: Fail

TC-017: Checkout form: long text in Name.

Precondition: Must be logged in with 1 item in the cart. Prepare a 100+ character string to paste into the Name field before opening the checkout modal.

Steps:

1. Add item to cart
2. Click Place Order
3. Type 100+ characters in the Name field
4. Complete the rest and click Purchase

Expected: Either the field caps input length OR the order completes without crashing.

Actual: The Name field accepted all 200 characters without any error or character limit warning. The order completed successfully and the long name appeared in the confirmation popup, slightly cut off. No crash or freeze occurred.

Status: Pass

TC-018: Homepage loads without console errors.

Precondition: No login needed. Open Chrome DevTools BEFORE loading the page - press F12 first, click the Console tab, then navigate to demoblaze.com so you catch errors on load.

Steps:

1. Open Chrome
2. Press F12 to open DevTools
3. Click the Console tab
4. Go to demoblaze.com
5. Reload the page

Expected: No red error messages appear in the console.

Actual: A Warning is displayed under Console - VIDEOJS: WARN: A plugin named "reloadSourceOnError" already exists. You may want to avoid re-registering plugins! (anonymous) @ video.min.js:12.

Status: Fail

TC-019: Navigation links all work.

Precondition: No login needed. Start on the homepage. Test nav links in both logged-out and logged-in state for full coverage - some links like Cart behave differently.

Steps:

1. Click Home in the nav
2. Click Cart in the nav
3. Click Contact in the nav
4. Click About us in the nav

Expected: Each link takes you to the correct page. No 404 errors.

Actual: All nav links worked correctly. Home returned to the homepage. Cart opened the cart page. Contact opened a modal popup with a message form. About us opened a modal with a video. Log in and Sign up opened their respective modal popups. No broken links or 404 errors were found.

Status: Pass

TC-020: Site usable on mobile (375px).

Precondition: No login needed initially. Open DevTools, enable device toolbar, set to 375px width BEFORE navigating to the site. Then test browse and cart actions at that width.

Steps:

1. Open Chrome DevTools (F12)
2. Click the phone/tablet icon to toggle device toolbar
3. Set width to 375px
4. Go to demoblaze.com, browse the site, add a product to cart

Expected: Layout is not broken. Buttons are tappable. Text is readable.

Actual: The nav bar collapsed into a hamburger menu which worked. However when viewing product pages part of the image on the right side is cut-off.

Status: Fail
